

Rectangular Pattern Connectors(150-500 PSI)*

This rectangular pattern connector is ideal for making a quick disconnect at test break points. It is panel mounted and contains stainless steel tubulations. The sectioned side view of the drawing shows the front half of the connector which is not threaded. All of the holes are threaded in the TH(threaded half) half. Each side of the connector can have different tubulation sizes. O-rings are incorporated on the threaded half (TH) connector.
