## End Of Life Notification SPC4000 Pressure Calibrator

Dear Customer,

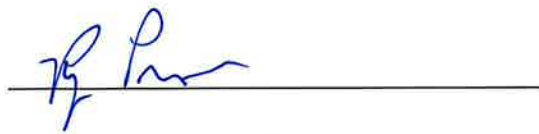

Scanivalve has been partnered with Mensor LP for many years to produce and support the SPC4000 series of Pressure Calibrators. The SPC4000 is an OEM custom adaptation of the Mensor APC600 / CPC6000 to suit our customer's specific needs. As of 12/31/2023, Mensor is ending software and hardware support for the APC600, CPC6000 and SPC4000. As such, Scanivalve will be categorizing the SPC4000 as 'End of Life' beginning 12/31/2023. More information on the SPC4000 'End of Life' status as well as updates on all our obsolete products can be found on our website at:

<https://scanivalve.com/support/legacy-product-information/>

The SPC4000 has been replaced by the SPC4050. The SPC4050 is the recommended replacement for the SPC4000 as it includes improvements to many of the functions as well as supports most of the SPC4000 pressure transducers.

If you have any questions, please contact us at: [techsupport@scanivalve.com](mailto:techsupport@scanivalve.com) or myself directly.

Regards,

**Ryan Pemberton**
